'Spiderman' nearly squashed at birth: Stan Lee

One of the most well-known comic book characters of all time, Spiderman, nearly didn't get off the ground. In the early 1960s, creator Stan Lee wanted to make a superhero character that would appeal to teenagers and young adults. He developed the character of Spiderman, who is a high school student by day and a superhero by night. However, the character almost never came to life. Lee's original idea was to make Spiderman a character that would resonate with teenagers, but he faced resistance from Marvel Comics, the publisher he worked for. Lee's colleagues believed the character was too mature for teenagers and would not be successful. However, Lee persisted and convinced Marvel to publish the character. The result was a massive success, and Spiderman became one of the most beloved comic book characters of all time.
